

Toyota Forklift Parts

Toyota Forklift Parts - In the United States, Toyota Materials Handling inc., or TMHU, has been the top selling lift truck dealer since 1992. Proudly celebrating more than 40 years of operations, the Irvine, California situated business offers a wide-ranging line of quality lift vehicles. Due to their reputation of excellence, reliability, and sturdiness, Toyota remains popular in this competitive market. Quality is the cornerstone of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota machines and components manufactured within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to continual development, and its environmental systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift vehicles emit 70% fewer smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A.- Leading the Industry

The head of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's success comes from its dedication to create high quality lift vehicles at the same time as offering superb customer assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's principal lift truck dealer and is among the magazines celebrated World's Most Admired Companies.

New Meaning to Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an outstanding company values towards environmental management within Toyota. Toyota's loaded history of environmental protection whilst retaining economic viability can not be matched by other corporations and undoubtedly no other resource handling manufacturer can thus far rival Toyota. Environmental responsibility is a fundamental feature of corporate decision making at Toyota and they are proud to be the first and only maker to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission values, and also meets California's more elaborate 2010 emission standards. The end creation is a lift vehicle that produces 70 percent less smog forming emissions than the current Federal standards tolerate.

Also starting in 2006, together with the Arbor Day Foundation, Toyota added to its commitment to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and neighborhood parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of dealers to non-profit organizations and local customers to help sustain communities all over the U.S.

Toyota's lift vehicles offer enhanced stability, visibility, output, ergonomics, and all the leading safety technology that has made Toyota an industry leader. The company's System of Active Stability, also known as "SAS"•, helps limit the possibility of accidents and accidental injuries, in addition to increasing productivity levels while minimizing the likelihood of product and equipment damage.

System Active Stability can discern circumstances that may lead to lateral instability and potential lateral overturn. When one of these conditions have been detected, the SAS will instantly engage the Swing Lock Cylinder to re-stabilize the rear axle. This changes the lift truck's stability trajectory from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding strength.

The SAS systems were originally utilized on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped propel Toyota into the lead for industry safety standards. Now, SAS is adopted on almost every new internal combustion products and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with obligatory operator education, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there have been an overall 35.5% decrease in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's hardnosed principles extend far beyond the machinery itself. The company believes in offering widespread Operator Safety Training services to help clients satisfy and exceed OSHA standard 1910.178. Education packages, video tutorials and a variety of materials, covering a broad scope of topics-from individual safety, to OSHA rules, to surface and load conditions, are available through the seller network.

Ever since the sale of its first lift vehicle in the U.S. to the construction of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has continued a solid presence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America now are manufactured in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land.

Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service components, with the entire investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and buyers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its founder, Sakichi Toyoda, in 1867, and finally a instruction center.

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most complete and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift vehicles, service, components, and financing features make Toyota dealerships a one-stop shop to guarantee overall consumer satisfaction.
